## 1. INTRODUCTION

The Annual European Insurance Overview is published by EIOPA as an extension of its statistical services in order to provide an easy-to-use and accessible overview of the European (re)insurance sector. The report is based on annually reported Solvency II information. This ensures that the data has a high coverage in all countries and is reported in a consistent manner across the EEA.

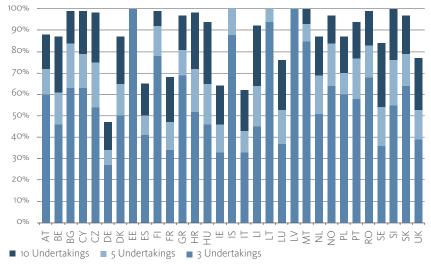

The report is objective, factual and data driven and does not contain analysis or policy messages. All indicators used in the report are calculated from the reported data from undertakings. While the topics and indicators covered is intended to be relatively stable over time, the report will be adapted to respond to changes in micro prudential and supervisory priorities. It will therefore support the supervisory community and industry with highly relevant and easily-accessible data at European level. This report is based on Annual reporting for 2019 and as such UK data are included in any EEA figures. Only countries with more than 3 undertakings will be displayed in charts with distributions.

The report is published with all charts data available for download in separate excel files.

## 2. LIFE MARKET OVERVIEW

For the majority of EEA countries (19) GWP increased in 2019. The Life market remains largely dominated by the Index-linked and Unit-linked insurance & Insurance with profit participation lines of business.

Figure 1: Concentration per country

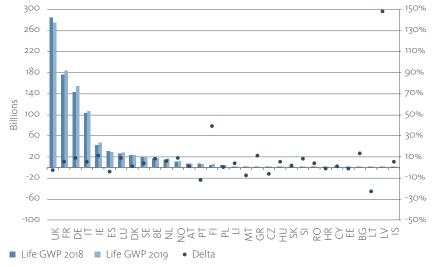

-EE, IS, LT & LV all show a 3 undertaking market concentration above 80%. This is a result of the small number of companies in these countries.

-Overall, DE remains as the least concentrated country followed by IT, IE & FR.

The concentration indicator is a measure of the market share of the national GWP that the 3, 5, and 10 biggest premium writers account for.

Figure 2: Aggregate GWP growth per country

UK, FR, DE & IT continue to be the largest Life underwriters.

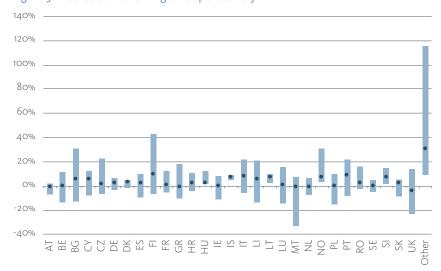

LV have the largest increase year on year at 147%; with FI reporting the second largest increase at 38%.

LT have the largest decrease at -2.4%.

The aggregated GWP for both 2018 and 2019 are displayed per country (left axis). "Delta" displays the increase/decrease in % GWP of this year compared to last on the right axis.

5 countries (AT, GR, MT, NL & UK) had a reduction in GWP at median level with UK's contraction of ~4% being the largest.

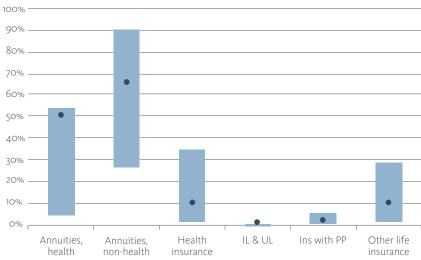

Figure 3: Distribution of GWP growth per country

The year on year growth in GWP is the increase or decrease in premiums written this year compared to last. The chart shows interquartile range and median

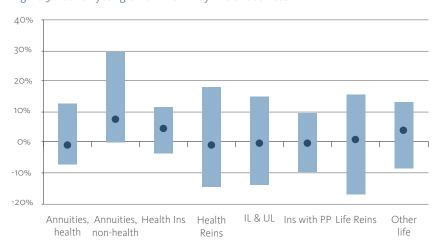

Both Annuities LOBs are substantially more reinsured than any other Life line of business. 'IL&UL' is the least reinsured.

Defined as the percentage of GWP ceded to reinsurers. The chart shows interquartile range and median.

Figure 5: Year on year growth in GWP by line of business

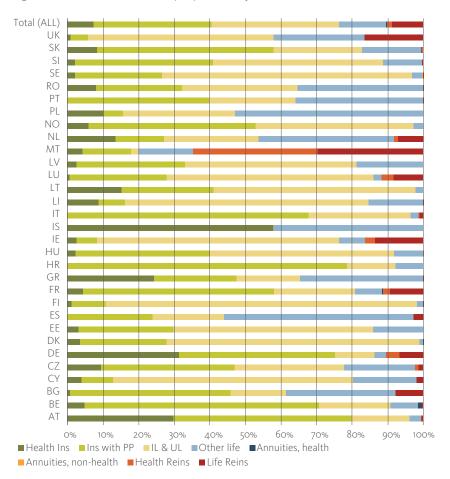

Only 3 out of 8 line of business ('Annuities non-health', 'Health Ins' & 'Other life') display an increase at the median level.

No LOB has decreased by more than 2% at a median level.

The year on year growth in GWP is defined as the total GWP for this year divided by the same figure for the preceding year, minus one. The chart shows interquartile range and median

#### 2.1. LIFE LINES OF BUSINESS

Figure 6: Life – Line of business split per country based on GWP

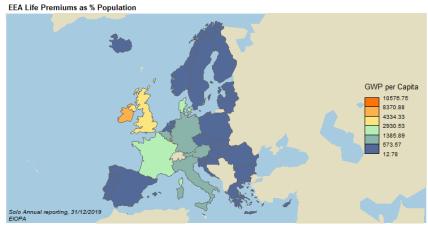

- At an EEA level, the 'Ins with PP' and 'IL & UL'lines of business account for ~70% of GWP.
- 17 countries have a single line of business accounting for 50% or more of GWP.
- In MT the life market is dominated by reinsurance LOBs

The volume of GWP by line of business for each country expressed as a percentage of total GWP.

#### 2.2 LIFE - EEA PREMIUM BREAKDOWN

Figure 7: Life – Gross written premiums divided by GDP

- LU(~10,500) & IE(~5,000) have the highest proportion of Life GWP per Capita.

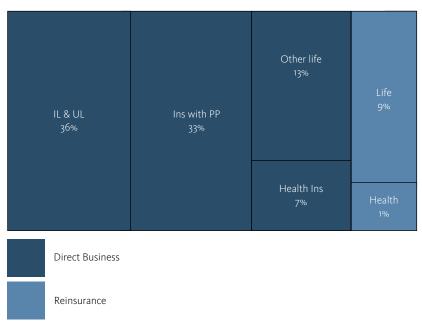

The location of underwriting for any Life business written by all undertaking and their EEA branches, including by FOE and FPS, within the EEA. GDP figures sourced from Eurostat.

- IL & UL and Ins with PP are the dominant lines of business in the life market accounting for almost 70% of premiums.

- Annuities, health(<1%) and Annuities, non-health(<1%) are not visible in the chart.

Figure 8: Life – Lines of Business by premium volume

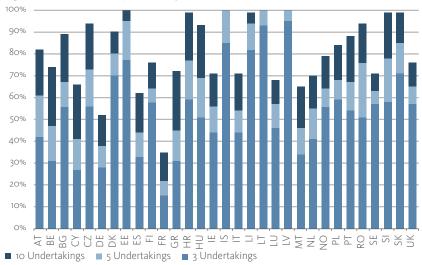

The total life market split into lines of business by premium volume. Split between direct business and reinsurance displayed.

## 3. NON-LIFE MARKET OVERVIEW

Non-Life GWP has increased for the vast majority of countries (27) in 2019. More than 50% of the Non-life market is made up of General Liability, Motor Vehicle Liability, Medical Expenses insurances & Fire and other damage to property insurance lines of business.

Figure 9: Concentration per country

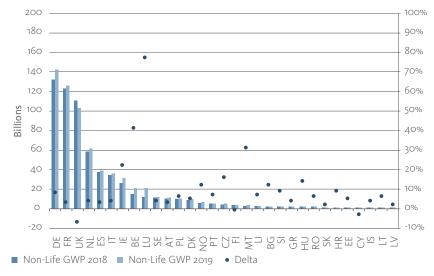

IS, LI, LV & LT show a 3 undertaking market concentration above 80%. Such high levels of concentration are attributable to the relatively few companies in each country.

The least concentrated market is FR followed by DE, CY, GR and ES.

The concentration indicator is a measure of the market share of the national GWP that the 3, 5, and 10 biggest premium writers account for.

Figure 10: Aggregate GWP growth per country

DE, FR & UK are the largest Non-Life underwriters.

Growth of ~77% is observed for LU. BE at 41% have the second largest increase.

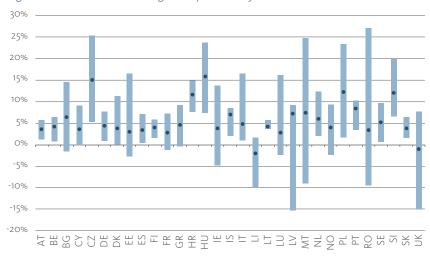

UK, CY & FI are the only countries to display decreases in premium at -9%, -3% and -1% respectively.

The aggregated GWP for both 2018 and 2019 are displayed per country. Delta displays the increase/decrease in % GWP of this year compared to last.

Median growth of ~15% is observed for CZ & HU. HR, PL & SI show a median value above 10%.

Only LI & UK show a decrease in GWP volume at a median level this year with a decline of  $\sim$ 2% &  $\sim$ 1% respectively.

Figure 11: Distribution of GWP growth per country

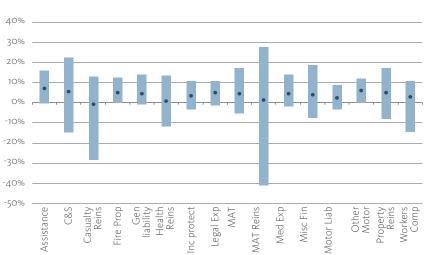

The year on year growth in GWP is the increase or decrease in premiums written this year compared to last. The interquartile range is displayed. The chart shows interquartile range and median

Figure 12: Year on year growth in GWP per line of business

Only Casualty Reins displays a decrease in premium volume at a median level of ~1%.

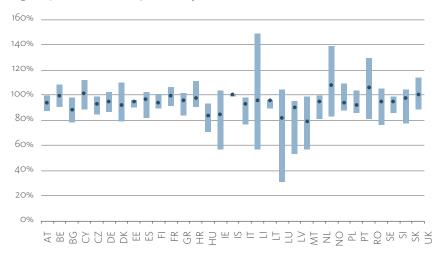

The biggest increase is observed in Assistance & Other Motor.

MAT Reins has by far the largest interquartile range of growth.

The year on year growth in GWP is defined as the total GWP for this year divided by the same figure for the preceding year, minus one; for each line of business. The chart shows interquartile range and median

#### Figure 13: Combined ratio per country

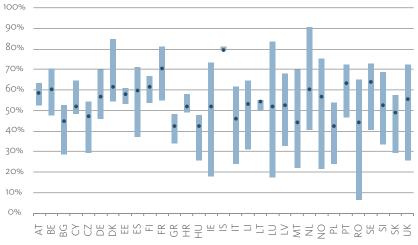

Only CY, IS, NO, RO & UK display median combined ratio values at or above 100%. BE, ES, FR, HR, LI, LT & SK all above 95%.

HU, IE, LU & MT report the lowest median values at between 79% and 85%.

The Combined Ratio is defined as the sum of claims and expenses divided by premiums earned. The chart shows interquartile range and median.

Figure 14: Claims ratio per country

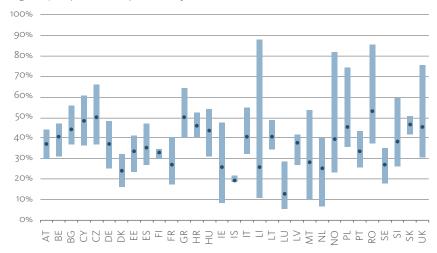

IS reports the highest median claims ratio at 79% whilst GR, HU & PL report the lowest at ~42%.

The claims ratio is defined as the claims paid divided by premiums earned. The chart shows interquartile range and median.

LU & IS report a median expense ratio below 20%, with LU as low as 12%.

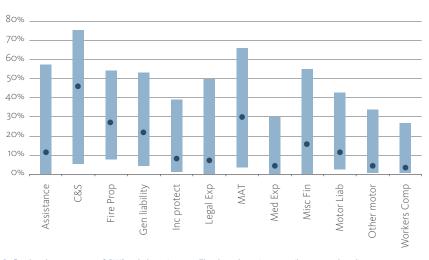

More than half of countries report a median expense ratio between 30% & 50%.

Figure 15: Expense ratio per country

The expense ratio is defined as the expenses divided by premiums earned. The chart shows interquartile range and median.

Figure 16: Share of reinsurance per LOB

 $Defined \ as \ the \ percentage \ of \ GWP \ ceded \ to \ reinsurers. \ The \ chart \ shows \ interquartile \ range \ and \ median.$ 

'Credit & Suretyship' LOB displays the highest median value at just under 45% and the largest interquartile range.

Inc protect, Legal exp, Med exp, Other Motor and Workers' Comp all display median values below 10%.

Figure 17: Combined ratio per line of business

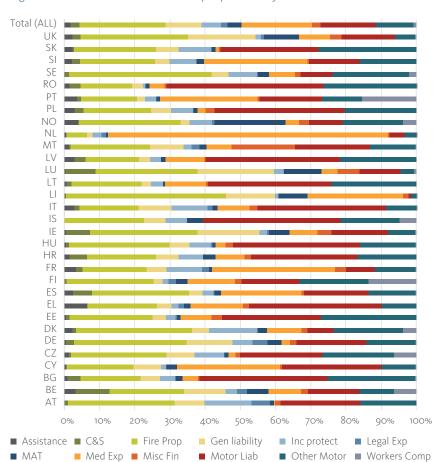

'MAT Reins' has the lowest median combined ratio value at just above 50%, followed by Property and Health Reinsurance LOB.

'Motor Liab' is the only line of business with a median value above 100%. 'Other Motor' & 'Med Exp' sit just below 100%.

Defined as sum of claims and expenses divided by premiums earned for each line of business. The chart shows interquartile range and median.

#### 3.2 NON-LIFE LINES OF BUSINESS

Figure 18: Non-Life – Line of business split per country based on GWP

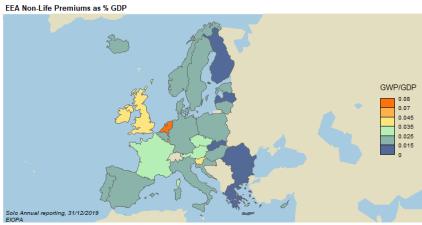

- At EEA level the most dominant Non-life line of business is fire and other damage to property, followed by medical expense and motor vehicle liability.

- NL is the most concentrated Nonlife market with medical expense insurance accounting for ~80% of GWP.

#### 3.3 NON-LIFE - EEA PREMIUM BREAKDOWN

Figure 19: Non-Life – EEA Gross Written premium

- NL(~7.5%) and MT(~6%) have the highest GWP/GDP ratio.

The location of underwriting for any Non-life business written by all undertaking and their EEA branches, including by FOE and FPS, within the EEA.

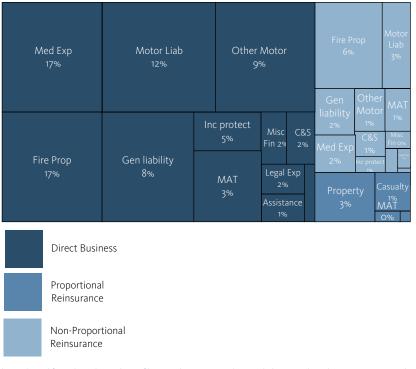

Figure 20: Non-Life – Lines of Business by premium volume

- 'Med Exp', 'Fire Prop', 'Motor Liab' & 'Other Motor' account for over 55% of business in the non-life market.
- Non-Prop Health reinsurance (0.2%) and Prop Worker's Comp reinsurance (0.1%) are not visible in the chart.

The total non-life market split into lines of business by premium volume. Split between direct business, proportional reinsurance and non-proportional reinsurance displayed.

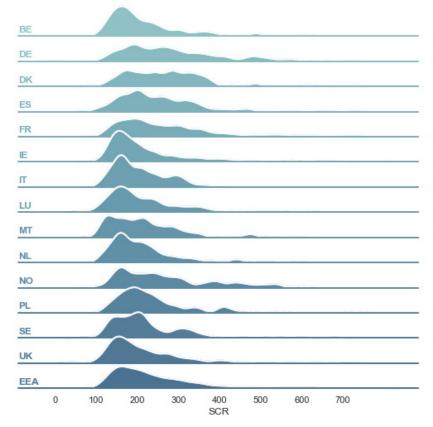

## 4. SOLVENCY & CAPITALISATION

The majority of countries (17 out of 31), report a median SCR ratio of over 200%; and for all countries a median MCR above 250% is reported. Market risk is the most dominant risk module accounting for between 25% and 80% of BSCR for all countries. For the majority of countries(26 out of 31), Tier 1 – unrestricted capital accounts for 90% or more of OF.

#### 4.1 SCR AND MCR DISTRIBUTION

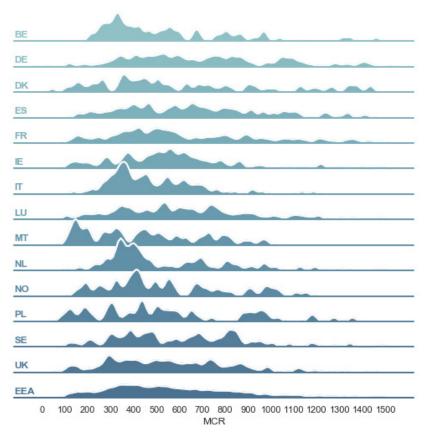

Figure 21: SCR ratio full distributions per country

- For most countries the majority of undertakings are concentrated within the 100-200% range with a long tail to the higher coverage
- At EEA level we can see that the vast majority of undertakings fall between the 100-300% range.

The chart above shows the distribution of SCR ratios for each country; that is the total eligible own funds divided by the Solvencycapital requirement for each country. Countries with more than 55 undertakings displayed on their own line.

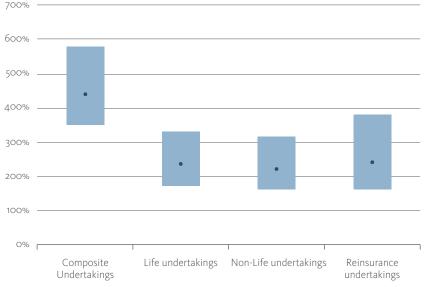

Figure 22: MCR ratio full distributions per country

- Distributions of MCR ratios are far more erratic than for SCR with some undertakings maintaining extremely high ratios.
- At EEA level this effect is smoothed showing a peak concentration between 300-500%.

The chart above shows the distribution of MCR ratios for each country; that is the total eligible own funds divided by the Minimum capital requirement for each country. Countries with more than 55 undertakings displayed on their own line.

Figure 23: SCR distributions by company type

The following figures display the SCR coverage ratios by company type and below, the SCR & MCR distributions by country. The charts show interquartile range and median.

- For all company types a median value above 200% is observed and 25<sup>th</sup> percentile value above 150%.
- Composite undertakings have a substantially higher SCR distribution than other company types.

Figure 24: SCR coverage interquartile range

- DE displays the highest SCR coverage distributions with median values of ~300% and lower quartile values above 200%.

- LV is the only country reporting a median value of under 150%.

- The vast majority of countries (27) have a median value between 150% & 250%.

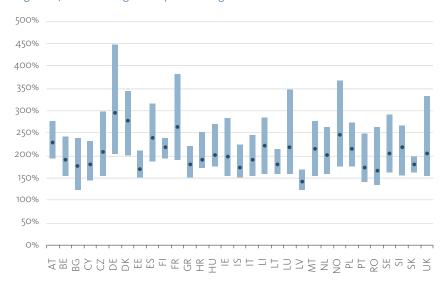

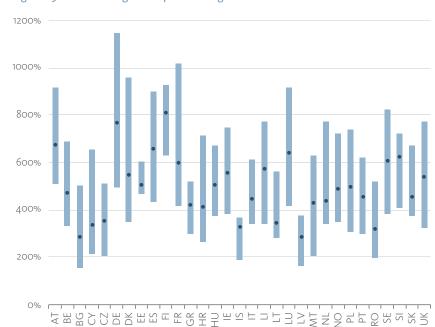

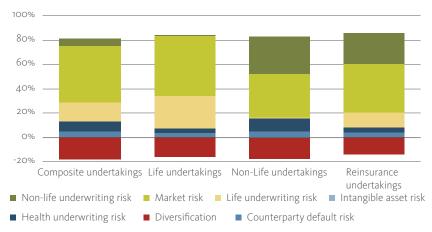

Figure 25: MCR coverage interquartile range

- FI have the highest median MCR coverage value at >800% - BG & LV are the only countries with median values below 300%.

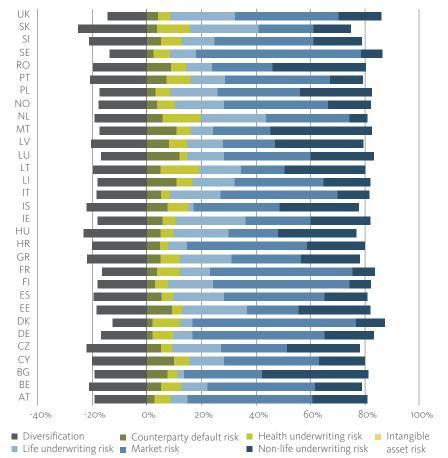

# 4.2 BSCR COMPOSITION – STANDARD FORMULA USERS

Figure 26: BSCR composition by module for standard formula users by business type

The aggregated value of the Solvency Risk Modules for Standard Formula users by company type.

Figure 27: BSCR composition by module for standard formula users by country.

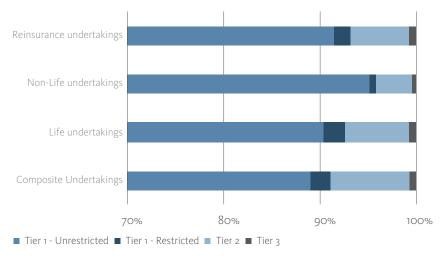

- The most prominent non underwriting related risk is market risk accounting for between 20% and 55% of BSCR.
- Diversification varies between ~15% for some countries up to ~25% for others. SK & HU have the highest value whilst DK, SE & UK have the lowest.

The aggregated value of the Solvency Risk Modules for Standard Formula users by country. Diversification represents the benefits in capital required after aggregating the risk modules and submodules with the prescribed standard correlation matrixes.

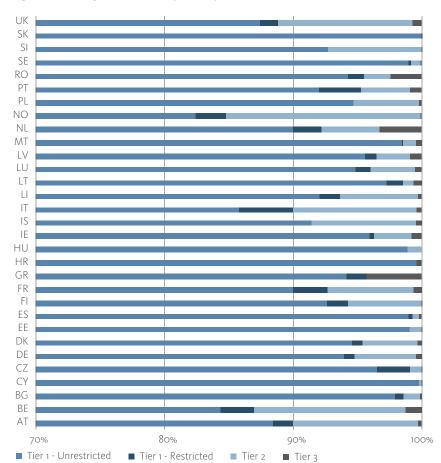

#### 4.5 TIERING OF OWN FUNDS

Figure 28: Tiering of own funds EEA by business type

Shows the breakdown of eligible own funds to meet the SCR into the tiers of own funds which it consists of.

Figure 29: Tiering of own funds by country

Shows the breakdown of eligible own funds to meet the SCR into the tiers of own funds which it consists of.

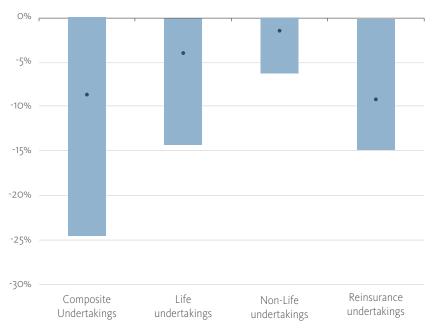

- CY, EE, HR, HU, SE & SK all have over 99% Tier 1 unrestricted capital within their own funds.

- 5 countries have a proportion of Tier 1 – unrestricted own funds below 90% with NO lowest at ~82%.

- GR have the highest proportion of Tier 3 own funds at >4%.

# 4.4 IMPACT OF LOSS ABSORBING CAPACITY OF DEFERRED TAXES (LAC DT) AND EXPECTED PROFITS INCLUDED IN FUTURE PREMIUMS (EPIFP)

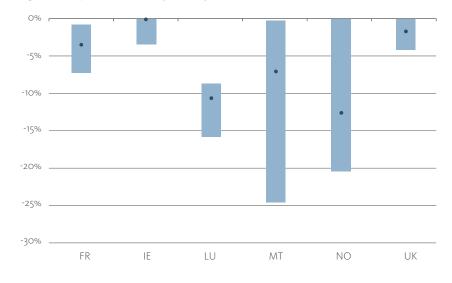

#### Figure 30: Impact of LAC DT by business type

- The loss absorbing capacity of deferred tax assets has the highest impact for reinsurance & composite undertakings

Loss absorbing capacity of deferred tax assets expressed as a percentage of the eligible own funds to meet the Solvency Capital Requirement by company type. The chart shows interquartile range and median

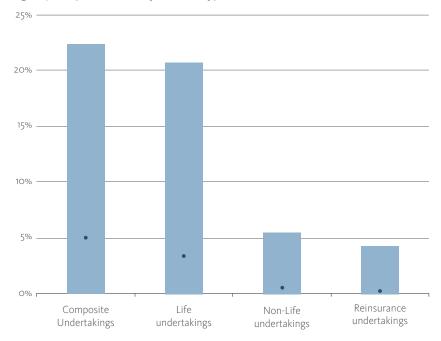

#### Figure 31: Impact of LAC DT by country

- At a country level, large differences can be observed in the impact of LAC DT.
- NO have the highest impact at 12.5%.
- Only countries with 3 or more entities displayed.

Figure 32: Impact of EPIFP by business type

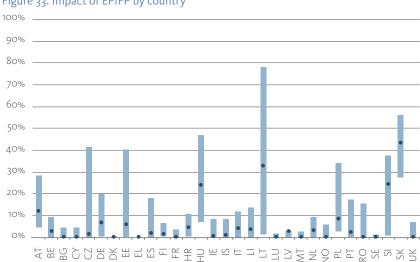

- EPIFP has the highest impact on EOF for composite undertakings at ~4.8%, followed by ~3.1% for Life undertakings.

The expected profit in future premiums expressed as a percentage off the eligible own funds to meet the Solvency Capital Requirement by country. Standard formula users only. The chart shows interquartile range and median

Figure 33: Impact of EPIFP by country

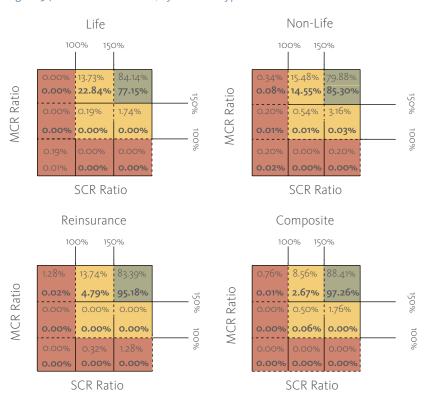

The impact of EPIFP on EOF at a country level has the largest impact for SK with a median value of ~43%.

The expected profit in future premiums expressed as a percentage off the eligible own funds to meet the Solvency Capital Requirement by country. The chart shows interquartile range and median

#### 4.5 SCR AND MCR COVERAGE

Figure 34: SCR and MCR Ratio, by business type

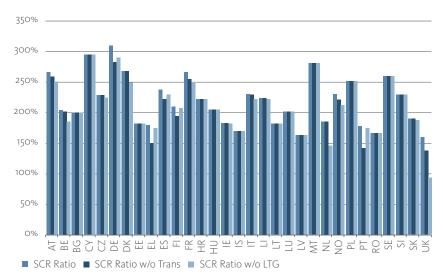

- Composite & reinsurance undertakings are the best covered type of undertaking with >95% of companies, in terms of total assets, above 150% for each metric.

The figures above display the capitalisation of companies when split out into different groupings. The thresholds are set at 100% and 150% coverage for both SCR and MCR. The green area denotes companies who are above 150% in each, yellow shows companies between 100% and 150% in one or both categories, and the red areas denote a company with less than 100% in one or both categories.

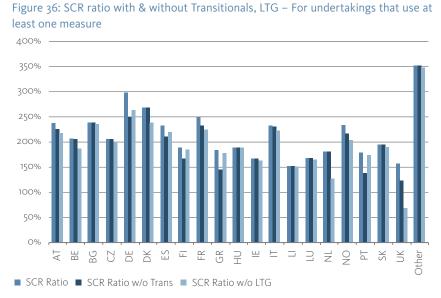

The first figure in each cell is the share in terms of number of companies, the second bold figure is in terms of total assets.

# 4.6 LONG TERM GUARANTEES AND TRANSITIONAL MEASURES

Figure 35: SCR ratio with & without Transitionals, LTG – all undertakings

The SCR ratio calculated with & without the impact of transitionals and long term guarantees, respectively. Sample includes all undertakings irrespective of whether or not they use any of the measures.

The SCR ratio calculated with & without the impact of transitionals and long term guarantee measures, respectively. Sample includes undertakings who use at least one of the measures.

dependence on Transitionals and Long Term Guarantee measures with an impact of 23% and 67% respectively in terms of SCR ratio. - Transitionals have the highest

- UK show the highest combined

 Iransitionals have the highest impact for PT with a 36% drop in SCR ratio whilst Long Term Guarantee measures most impact UK SCR ratios by 67%.

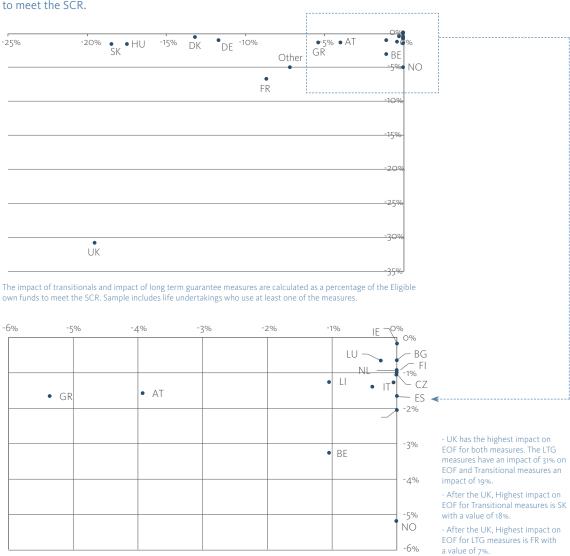

Figure 37: Impact of transitionals and LTG measures per country on Eligible own funds to meet the SCR.

# 5. INVESTMENTS

In terms of insurance sector asset types (by CIC codes), EEA investments are almost 60% attributed to Government and Corporate Bonds (CIC 1 & 2).

#### **5.1 ASSET TYPE BREAKDOWN**

Figure 38: Asset type allocation of reported assets (by CIC codes)

	Government bonds	Corporate bonds	Equity	nvestment funds Collective Investment Undertakings	Structured notes	Collateralised securities	Cash and deposits	Mortgages and loans	Property	Other investments
	1	2	3	4	5	6	7	8	9	0

Total	28.0%	26.2%	12.5%	19.9%	1.1%	0.6%	4-3%	5.3%	2.0%	0.2%

CIC Code prevalence amongst reported assets. Non index-linked/unit-linked.

The Complementary Identification Code (CIC) is a set of industry standard codes for identifying the specific type of financial instrument under Solvency II. In the visualisation below the prevalence of instrument type is displayed.

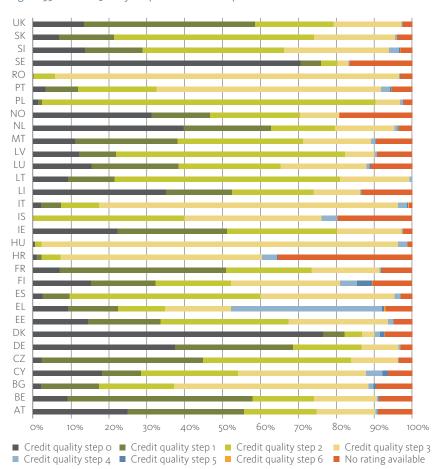

## 5.2 **CREDIT QUALITY**

Figure 39: Credit Quality Step allocation of reported assets

- CQS 3 is the predominant rating for the most countries.

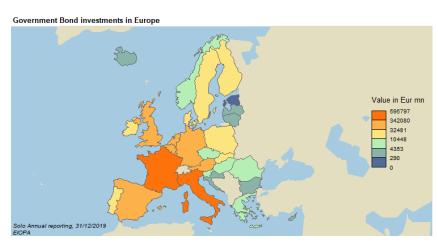

- CQS 0 is predominant for two countries, DK & SE.

- No Rating Available is most prevalent in HR.

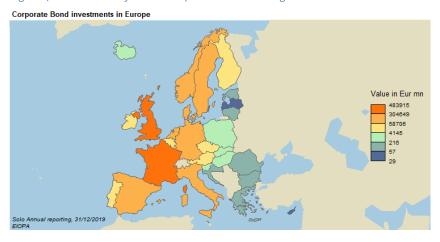

Credit Quality Step reported for relevant assets (CIC: 1, 2, 5, 6). Allocation by country. Standard Formula users only. Credit Quality Step (CQS) is a standardised scale of credit quality with mappings to the credit ratings of the largest ratings agencies. CQS o-3 correspond to investment grade assets with 4-6 being non-investment grade.

#### 5.3 LOCATION OF INVESTMENTS

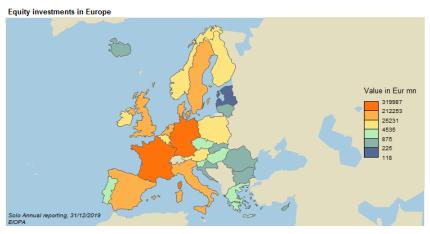

The location of investment for all Government Bonds, excluding those held for unit-linked or index-linked portfolios, i.e. where CIC main category is equal to 1.

Figure 41: Issuer country for EU Corporate bond holdings

The location of investment for all Corporate Bonds, excluding those held for unit-linked or index-linked portfolios, i.e. where CIC main category is 2.

Figure 42: Issuer country for EU Equity holdings

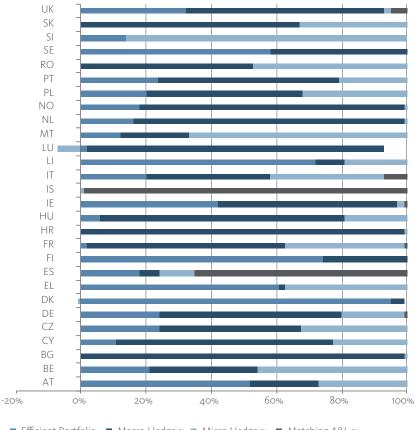

The location of investment for all Equity, excluding those held for unit-linked or index-linked portfolios, i.e. where CIC main category is 3.

- Of those government bonds held by (re)insurance undertakings and issued in Europe, FR and IT together account for 45%. The top 5 issuers of government bonds (FR, DE, IT, ES & UK) together amount to >75% of the total.
- Of those corporate bonds held by (re)insurance undertakings and issued in Europe, FR and UK together account for ~43%.
- Of the equity held by (re) insurance undertakings and issued in Europe, FR and DE together account for 50%.

#### 5.4 USE OF DERIVATIVES

Figure 43: Purpose of derivatives by country

■ Efficient Portfolio ■ Macro Hedge % ■ Micro Hedge % ■ Matching A&L % management %

The nominal value of derivatives for each purpose divided as a percentage of the total nominal derivative value.

### 5.5 SECTOR DISTRIBUTION

Figure 44: Sector allocation of reported assets (by NACE codes)

NACE (Nomenclature des Activités Économiques dans la Communauté Européenne) is the European statistical classification of economic activities. For assets with CIC 1, 2, 4 & 5.

<sup>-</sup> Figure 42 shows that the most prevalent NACE code sectors reported in 2019 are; K.64.1.9 – Other monetary intermediation, K64.3.0 – Trusts, funds and similar financial entities, K66.3.0 – Fund management activities, and O – Public administration and defence; compulsory social security.

<sup>-</sup> A non-negligible quantity of assets are being reported without a NACE code for some countries.

#### **GETTING IN TOUCH WITH THE EU**

#### In person

All over the European Union there are hundreds of Europe Direct information centres. You can find the address of the centre nearest you at: <a href="https://europa.eu/european-union/contact\_en">https://europa.eu/european-union/contact\_en</a>

#### On the phone or by email

Europe Direct is a service that answers your questions about the European Union. You can contact this service:

- by freephone: 00 800 6 7 8 9 10 11 (certain operators may charge for these calls),
- at the following standard number: +32 22999696 or
- by email via: <a href="https://europa.eu/european-union/contact\_en">https://europa.eu/european-union/contact\_en</a>

#### FINDING INFORMATION ABOUT THE EU

#### Online

Information about the European Union in all the official languages of the EU is available on the Europa website at: <a href="https://europa.eu/european-union/index\_en">https://europa.eu/european-union/index\_en</a>

#### **EU Publications**

You can download or order free and priced EU publications at: <a href="https://op.europa.eu/en/publications">https://op.europa.eu/en/publications</a>. Multiple copies of free publications may be obtained by contacting Europe Direct or your local information centre (see <a href="https://europa.eu/european-union/contact\_en">https://europa.eu/european-union/contact\_en</a>).

#### EU law and related documents

For access to legal information from the EU, including all EU law since 1952 in all the official language versions, go to EUR-Lex at: <a href="http://eur-lex.europa.eu">http://eur-lex.europa.eu</a>

#### Open data from the EU

The EU Open Data Portal (<a href="http://data.europa.eu/euodp/en">http://data.europa.eu/euodp/en</a>) provides access to datasets from the EU. Data can be downloaded and reused for free, for both commercial and non-commercial purposes.
